INTRODUCTION

This publication presents Kansas employment and wages for calendar year 2005. The Quarterly Census of Employment and Wages (QCEW) report, a compilation of data collected from the employer's Quarterly Wage Report and Unemployment Tax Return (Form K-CNS 1001) and the Multiple Worksite Report (BLS 3020), is the source of information for this publication.

Annual average employment and wages for the State, the Metropolitan Statistical Areas (MSAs) and each of the 105 counties in Kansas are included. Statewide and MSA information is presented by North American Industry Classification System (NAICS) two-digit sector and three-digit subsector codes. NAICS provides enhanced industry comparability among the three North American Free Trade Agreement (NAFTA) partners: Canada, Mexico and the United States. Establishments are grouped together based on their production processes. Additional data by three-digit NAICS code for these geographical areas may be available upon request. Due to the lack of available historical data in the new NAICS format, previously supplied 10-year industry comparison tables could not be provided.

For statewide and the MSAs, tables showing absolute and percent changes by industry sector are displayed. Also presented are employment and employing units by size class.

Throughout the publication, information that cannot be released due to disclosure restrictions has been flagged with a "D." In some instances, tables may not add due to rounding.

NAICS CODES (North American Industry Classification System)

NAICS is an industry classification system that groups establishments into industries based on the activities in which they are primarily engaged. It is a comprehensive system covering the entire field of economic activities, producing and non-producing.

ESTABLISHMENT

An establishment, in NAICS United States, may be described as an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed.

REPORTING UNIT

A reporting unit is the economic unit for which an employer submits data on an unemployment tax return, a statistical supplement or other employment and wage report.

EMPLOYMENT

Employment for a given month is the number of employees covered by the Kansas Employment Security Law who work during or receive pay for any part of the pay period which includes the 12th of that month.

TOTAL WAGES

Total wages are the total amount of wages paid to workers covered by the Kansas Employment Security Law for a quarter.

DISCLOSURE RESTRICTIONS

Employment and wage data will not be disclosed for any industry level that has fewer than three reporting units or if one unit accounts for 80 percent or more of employment. Throughout the publication, information that cannot be released due to disclosure restrictions has been flagged with a "D." In addition, K.S.A. 44-714(f) states, "Information thus obtained or obtained from any individual pursuant to the administration of this act shall be held confidential, except to the extent necessary for the proper presentation of a claim by an employer or employee under the employment security law, and shall not be published or open to public inspection, other than to public employees in the performance of their public duties."
